1. **Choose the Right Options on the Phone Menu**

Once connected, you'll likely encounter an automated menu system. Listen carefully and select the option that corresponds to your concern. This ensures your call is routed to the correct department, reducing wait times and confusion.

1. **Call During Low-Traffic Hours**

Airline call centers tend to experience high volumes of calls during midday and early evening. To minimize waiting, try calling during off-peak hours such as early morning or late at night. Early weekdays often have less traffic compared to weekends or Mondays.

1. **Prepare Your Travel Information in Advance**

To speed up your request, gather the necessary details before placing your call. This typically includes:

- Booking reference or ticket number
- Passport or ID details
- Travel dates and destinations
- Loyalty program number (if applicable)

Having this information ready ensures a faster and smoother customer service experience.

1. **Clearly State Your Concern**

Many customer service systems use automated voice recognition to guide calls. Speak clearly and use simple, direct keywords such as "flight change," "refund," or "baggage assistance" to help the system process your request accurately.

1. **Request a Callback if Offered**

If the wait time exceeds a certain limit, you may be given an option for a callback. Take advantage of this feature to avoid waiting on hold. The system will hold your spot in the queue and return your call when an agent becomes available.

1. **Mention Your Loyalty Status Early**

Etihad Guest loyalty members often receive priority services. If you are a member, mention this early in the call to potentially speed up the process and unlock additional support options.

1. **Use Etihad's Website or Mobile App for Simple Tasks**

While calling is ideal for complex issues, many tasks such as seat selection, meal preferences, or basic flight changes can be handled easily through Etihad's official website or mobile app.

Resolving minor issues online can save valuable time.
